

Product Bulletin

PRODUCT NAME

DRILL FOAM A

APPLICATION

Foaming Agent for Air Drilling

DESCRIPTION

Drill Foam A is a proprietary foaming agent specifically formulated for air drilling. The product produces a stable, dense foam with excellent cuttings transport properties due to its long half-life. Drill Foam A is environmentally friendly; it contains no Glycol Ether EB. Drill Foam A is cold weather tolerant and is brine/oil/pH stable. Drill Foam A is completely compatible with normal drilling additives and is non corrosive.

PROPERTIES

AppearanceClear amber liquid
Density.....8.8 lbs. per gallon
pH.....6.8
Flash point.....>212°F
Freeze Point.....<-30°F
Environmental.....Readily Biodegradable

PERFORMANCE

Half Life of a 0.5% Solution:

- 50/50 Brine = 4.5 minutes
- Fresh Water = 5.8 minutes

USAGE

The dilution rate of the Drill Foam A should be determined based on specific drilling conditions.

STORAGE

Product should be stored unopened until used.

HANDLING

Refer to MSDS for safety and handling information.
