Product Bulletin

PRODUCT NAME

CL-345

Rig Wash/Degreaser

APPLICATION

Terpene based general degreasing

DESCRIPTION

CL-345 is a highly active non corrosive cleaner for the safe cleaning of oily surfaces. The unique surfactants of CL-345 allow for foaming and cleaning of oily deposits at high temperature. Highly effective on greasy deposits. Unique polar/nonpolar solvency makes CL-345 effective on most organic deposits.

PROPERTIES

Color..... Yellow to light green
Specific Gravity..... 1.04 g/ml
pH..... 10.5
VOC Content..... 7%

USAGE

CL-445 is typically spray applied as a 10-20% dilution in water. CL-345 can be used as is from the container on heavily oiled surfaces. Allow CL-445 time to penetrate the deposit before rinsing.

STORAGE

When stored at or below 85F in the original unopened shipping vessel, CL-345 has a usable life of 18 months from the date of manufacture.

HANDLING

Refer to SDS for safety and handling information.
